MICHIGAN DEPARTMENT OF HEALTH AND HUMAN SERVICES EVIDENCE-BASED PRACTICE: INDIVIDUAL PLACEMENT & SUPPORT 2018 DATA REPORT

September 2018

2018 Michigan Department of Health and Human Services Evidence-Based Practice Individual Placement & Support (IPS) Report

Report Prepared By:

Dominic D'Aguanno - M.B.A., EST, QMHP, IPS Consultant, Romulus, MI

Eric Karbowski - M.A., EST, QMHP, IPS Supervisor, Community Mental Health for Central Michigan, Mt. Pleasant, MI

Prepared for:

Michigan Department of Health and Human Services (MDHHS)

Report reviewed and edited by:

Brenda Stoneburner, M.A., LPC, Manager, Community Practices & Innovation Section, Behavioral Health and Development Disabilities Administration (BHDDA), Lansing, MI

Joe Longcor, B.A., Supported Employment Specialist, Community Practices & Innovations Section, Michigan Department of Health & Human Services, Lansing, MI

September 2018

Report supported by funds from Substance Abuse and Mental Health Services Administration, Center for Mental Health Services, through the Michigan Department of Health and Human Services.

2018 Michigan Department of Health and Human Services Evidence-Based Practice Individual Placement & Support (IPS) Report

"I feel so fortunate to have met Belal and Ghinwah. They are simply a pleasure to work with and the epitome of what a social service agency should be – caring, professional, and mentoring. They genuinely care about the people and the community they serve. Our partnership is something you cannot put a price on and I look forward to our continued successes in the future."

- Sandra Deanna, Human Resources Director, Double Tree Hilton in Detroit

"Last year Kate (Employment Specialist), reached out to me regarding an individual, Jordan who was interested in a maintenance position on the 3rd shift crew. She explained that he did not have a high school diploma or GED and suffered from social anxiety but had great mechanical skills and a very good work ethic. I like to give people a chance. We are not all meant for the same thing so this seemed like a good opportunity for him and Walmart."

- Ginger, Hiring Manager

"Working at Walmart has been life changing. I moved from part-time to full-time pretty quick. I have benefits through my employer which is huge. Plus, my wife and I are earning enough money to begin thinking about starting a family."

- Jordan

"I look forward to going to work now. I feel like I found a job that I truly like, and I go the extra mile to make sure that I go to work."

- Viviana Z

"I've worked my whole life and working is important to me. . . I wanted to get a job as a machine operator or a driver, and I'm happy that the opportunity at Wolverine came along."

- Burney

Report Prepared By:

Dominic D'Aguanno – M.B.A., EST, QMHP Eric Karbowski – M.A., EST, QMHP

Executive Summary:

This is the third Evidence-Based Practice/Individual Placement and Support (IPS) report completed for the Michigan Department of Health & Human Services/Behavioral Health and Developmental Disabilities Administration (MDHHS/BHDDA) representing the current 21 statewide IPS programs. The purpose of this report is to continue building on the foundational process and reporting mechanism for IPS programs in Michigan's public mental health system to shape future recognition, publications, and promotion of the IPS practice.

Michigan has been implementing the Evidence-Based Practice Supported Employment – IPS model since 2004. Prior to this report, the first published report was completed in 2017 preceded by an unpublished report in 2016. The baseline report was developed to create a tracking mechanism for IPS providers to share program data/outcomes for statewide observation. This (third) report is to build on the data and continue capturing longitudinal data in observation of data from Michigan's IPS programs. The data will provide information to guide IPS program growth in Michigan and identify organizational aspects about IPS programs, which vary across the state.

The report describes the current status of programmatic characteristics and conditions under which IPS programs serve Michigan residents through local Community Mental Health Services Programs (CMHSPs) or contracted providers. Information encompasses employment data, outcome measures, model adherence, business/consumer/employment staff interviews, and implications of the findings from these data. Also included in the 2018 report are retention benchmarks of individuals that obtained and maintained competitive employment reaching milestones of 90, 180 and 365 days at work during the time period of April 1st, 2018 to June 30th, 2018.

Through the years IPS has had a profound impact on many individuals across Michigan, making a significant difference in not only their lives but the lives of their families. In addition to sharing the life changing impact participation in IPS has had on individuals, highlighted in this data report are two stories from/about businesses and their experience(s) with the individuals and IPS model. Thank you to Double Tree by Hilton (Detroit) and Walmart (Mt. Pleasant) for their participation and stories below!

In addition to the recognition and support of the identified businesses, three Michigan citizens — Burney, Milaan, and Viviana share their experiences written by and told to their respective employment specialist. Through their experience and shared stories, we hope you will find similar threads among all three—increased confidence, self-worth, pride, and perhaps most importantly, hope.

Model:

Core Principles of IPS Supported Employment

IPS stands for Individual Placement and Support, which is the evidence-based practice of supported employment for people with severe mental illness.

Competitive employment is the goal

Employment specialists help clients obtain competitive jobs. Competitive employment is defined as paying at least minimum wage at a wage that others receive performing the same work; based in community settings alongside others without disabilities; and not reserved for people with disabilities. Clients prefer competitive jobs versus sheltered work. Working alongside others without psychiatric disabilities helps to reduce stigma and discrimination.

IPS supported employment is integrated with treatment

IPS supported employment services are closely integrated with mental health treatment. Employment specialists are members of multidisciplinary teams that meet regularly to review client progress. Discussions include clinical and rehabilitation information that is relevant to work, such as medication side effects, persistent symptoms, cognitive difficulties, or other rehabilitation needs. They share information and develop ideas to help clients improve their recovery.

Zero Exclusion: Eligibility is based on client choice

Every person with severe mental illness who wants to work is eligible for IPS supported employment, regardless of psychiatric diagnosis, symptoms, work history, or other problems, including substance abuse and cognitive impairment. The core philosophy of IPS supported employment is that all persons with a disability can work at competitive jobs in the community without prior training and that no one should be excluded from this opportunity. Agencies develop a culture of work so all practitioners encourage clients to consider working.

Attention to client preferences

Services are based on clients' preferences and choices, rather than providers' judgments. Client preferences help determine the type of job that is sought, the nature of support provided by the employment specialist and team, and whether to disclose the aspects of a person's psychiatric disability to the employer.

Benefits counseling is important

Employment specialists help clients to access ongoing guidance regarding Social Security, Medicaid, and other government entitlements. Fear of losing benefits is a major reason that clients may not want to seek employment. It is vital that clients obtain accurate information to inform and guide the plan for starting work and over time for making decisions about changes in wages and work hours.

Rapid job search

Employment specialists help clients seek jobs directly, rather than providing extensive preemployment assessment and training, or intermediate work experiences. Beginning the job search process early (i.e., within 30 days) demonstrates to clients that their desire to work is taken seriously and conveys optimism that there are multiple opportunities available in the community for clients to achieve their vocational goals.

Systematic job development

Employment specialists develop relationships with employers, based upon their clients' work preferences, by meeting face-to-face over multiple visits. Employment specialists learn about the work environment and the employers' work needs. They find out about jobs that they may not be aware of at employment sites. They gather information about the nature of job opportunities and assess whether they may be a good job fit. Employment specialists continue to make periodic visits because networking is how people find jobs.

Time-unlimited support

Follow-along supports are individualized and continued for as long as the client wants and needs the support. IPS specialists and other members of the treatment team provide work support. In addition, they look for natural supports (e.g., family member, co-worker) that would be available over time. The goal is to help the client become as independent as possible in his or her vocational role, while providing support and assistance as needed. Once a person has worked steadily (e.g., one year), they discuss transitioning from IPS. Dartmouth Psychiatric Research Center, 10/11/2011

Definition:

"Competitive employment" for the intent and purposes of this report means work (part-time or fulltime) in the community that anyone can apply for and pays at least minimum wage. The wage should not be less than the normal wage (and level of benefits) paid for the same work performed by individuals who do not have a mental illness. http://www.michigan.gov/mdhhs/0,5885,7-339-71550_2941_4868_38495_38496_38505---,00.html.

Delimitations:

The information provided in this report is delimited to data obtained from 21 programs in the State of Michigan that identify themselves as IPS providers with various levels of adherence to fidelity of the IPS model. It is assumed that the information and data collected from the IPS service providers or organizations are valid and reliable. Additionally, the information provided is reflective only of programs with at least one current state recognized external fidelity review or those awaiting completion during fiscal year 2018.

Employer Story

Double Tree Hilton (Detroit)

Being brought up in a very democratic home, my parents instilled in my sister and me the importance of recognizing and celebrating the differences in people and in other cultures. They were both immigrants from Italy, settled in Windsor, Ontario and became Canadian Citizens. After they were married, they moved to Detroit, Michigan and became American Citizens. My dad used to call the USA "the Promise Land" and growing up in Canada, they both experienced racial biases and discrimination.

I always had the idea of diversifying our hotel staff, particularly the Housekeeping Department. I find that a diversified work force strengthens a team and makes them more efficient. It increases employee morale as well as creativity within an organization. Job seekers are drawn to a company with a diversified work force because it is evident that the company is an equal opportunity employer.

I met with Belal Elkadri and Ghinwah Karkaba from Access, and together we have developed a great partnership in filling key positions at the hotel. At first everyone here at the hotel thought I was crazy for hiring people who spoke little or no English. The Department Managers kept saying, "How are we going to communicate? What will the guests say?" My response to them was "a smile, hard work, and good intentions are universal in any language!" We now have 8 women from the Middle East working in our Housekeeping Department and they are all excelling on the job. I have nothing but respect for these women – they defied the odds, they came to a foreign country not knowing the language, just to make a better life for their families. Some of their personal stories are harrowing – these women are simply amazing.

I want to highlight Emaduldeen Lafta, Director of Security. In March of this year, our ownership group terminated our Security contract with an outside security company, and decided that we should hire our own Security team due to the increasing number of car break-ins. I contacted Ghinwah at Access for some referrals because I had to hire 6 to 8 people immediately. She called and told me that she had the perfect person, and that is when I first met Mr. Lafta. When I interviewed him, I knew he was the perfect candidate for this position because he had worked and trained with the American Forces in Iraq. In fact, I thought he was over qualified for this position. His story of survival and how he got to the USA is gut wrenching – his son was killed – how do you get over that?! I introduced him to our owner, we hired him to Director of Security. Lafta (as everyone here calls him) is very good at what he does – he is very intelligent, a strategic thinker, and is very intuitive when it comes to reading people. He has a commanding and authoritative presence, and when he walks in a room, you just feel safe and secure because he is in charge. He is an impeccable dresser, a consummate professional, and is a great representative of our hotel within the community. He is truly an amazing man of strength and character.

Lafta assisted me with vetting and hiring our security staff (all Access referrals) and I am proud to say we have not had one incident of car break-ins since he started or any other serious security issues. Lafta also assists me and other managers in translating with our Arabic speaking employees. He makes himself available 24 hours a day and will help out any where he is needed. He is invaluable to our hotel and I cannot imagine what we would do without him.

I feel so fortunate to have met Belal and Ghinwah. They are simply a pleasure to work with and the epitome of what a social service agency should be – caring, professional, and mentoring. They genuinely care about the people and the community they serve. Our partnership is something you cannot put a price on, and I look forward to our continued successes in the future.

- Sandra Deanna, Human Resources Director

Employer Story

Walmart (Mt. Pleasant)

Walmart in Mt. Pleasant, MI has been a strong partner with the IPS program since 2009 in Isabella County. Over the course of the last nine years many consumers have been placed with Walmart, some of which are still employed today.

"Working at Walmart has been life changing. I moved from part-time to full-time pretty quick. I have benefits through my employer which is huge. Plus, my wife and I are earning enough money to begin thinking about starting a family."

- Jordan, Walmart Employee

"Last year Kate Pickens, Employment Specialist, reached out to me regarding an individual, Jordan who was interested in a maintenance position on the 3rd shift crew. She explained that he did not have a high school diploma or GED and suffered from social anxiety but had great mechanical skills and a very good work ethic. I like to give people a chance. We are not all meant for the same thing so this seemed like a good opportunity for him and Walmart."

- Ginger, Hiring Manager

Throughout this partnership the Employment Specialists have had the opportunity to educate Walmart on services provided at CMH and the IPS Core Principles.

"I enjoy working with Walmart. Ginger and I work together to find the right fit for each individual for their optimal success because when they succeed, the business succeeds."

- Kate Pickens, Employment Specialist

Because of this established partnership, interested candidates often get the opportunity to interview. At the very least, if not employed, feedback is given to Kate so she can help further educate consumers on future employment opportunities. At the very best, individuals are hired and further their career with Walmart like Jordan. After his initial two months, he was offered full-time wages and benefits which meant his goal of stopping the need for government assistance was obtained. As of recent months, he applied for a supervisory roll and was offered the position. Jordan is still with Walmart today because they understood how matching a person's need with the needs of the business creates the perfect opportunity for successful employment.

- Ginger Bradley, Personnel Manager and Kathryn Pickens, Employment Specialist

Burney's Success Story

"I've worked my whole life and working is important to me," Burney says. "I wanted to get a job as a machine operator or a driver, and I'm happy that the opportunity at Wolverine came along."

Though he cannot afford a car of his own as he rebuilds his life, Burney Cochran works as a delivery driver. Every weekday, he takes the long bus rides between his apartment in southwest Detroit and Wolverine Solutions Group on the east side. Working for Wolverine, Burney drives about 90 miles on his shift, picking up bulk mail from different companies and running other errands. Burney is a careful driver, unperturbed by the drivers who are less respectful about sharing the road.

"It doesn't bother me because I stay in my lane," Burney, 54, says. "I like being by myself in the van and getting where I need to go to get the job done."

Burney's journey to this place in life – where he has stable housing, steady work, and peace of mind – has been one of overcoming difficult detours. Five years ago, he was living on the streets and sleeping in shelters. He had been homeless for several years, after losing his job at an auto supply manufacturer when the plant closed during the recession and the auto industry crisis. Unable to find other work, complicated by a felony conviction when he was 21 that resulted in ten years in prison, he became depressed and homeless.

While he was on the streets, Burney met Southwest Solutions' homeless outreach team from our Housing Resource Center (HRC). The HRC is devoted to helping individuals and families experiencing homelessness or at-risk of homelessness. HRC staff secured a housing voucher for Burney, and he moved into his current apartment in March 2013. Burney was assigned a supportive housing caseworker, Bridget Wright, who visits him monthly at the unit to support his recovery and his efforts to maintain his housing. Burney receives mental health services at our Waterman Outpatient Clinic.

At the Waterman Clinic, Burney decided to enroll in our IPS-Supported Employment program, which provides numerous services to help individuals recovering from mental illness find work. Burney worked with Employment Specialist Manuel Partida who helped Burney with his resume, interview skills, and job searches. The program also assists participants with their transportation, legal, personal appearance (clothing, shoes, and grooming), and other needs.

Burney has been at Wolverine since last April. He is one of 59 participants in our IPS-Supported Employment program who acquired jobs last year. Southwest Solutions has offered the program since 2007.

"The foundation of the program is that work can promote recovery and wellness," says Barbara Gray, who oversees the program. "For some it could be a sense of being like everyone else in his or her family, for others it may mean more effectively managing symptoms enough to feel in control, for some clients it could allow them to break out of social isolation and for all, it allows them to become a little more financially stable."

Milaan Success Story

When I met Milaan in May of 2017, she was searching for an outlet for her and her 4 children. She is an Iraqi refugee who escaped war torn Iraq to a new home she'd call, America. Living in a new city, let alone a new country, was a whole new world for Milaan. Coping with depression and PTSD was only one of many challenges she faced. Adjusting to a new home and raising four sons while making ends meet was the beginning of Milaan's journey.

Milaan was referred to the Supported Employment program hoping to find the perfect job to help support her family. Her obstacles were evident from the first day I met Milaan. Aside from her minimal English-speaking skills, health issues prevented her from pursuing employment. Her son suffered from severe allergies which kept him from school several days a week. In her efforts to balance care for her son and providing for her family, Milaan's options appeared nonexistent. How will she be able to successfully work while tending to her son's needs? It was then, Milaan and I reassessed how to approach the job search process.

Working collaboratively with Milaan's therapist, I was able to help Milaan talk about different options and address a time table for when it would be most feasible for her to start working. To move forward, my objective was to set small goals each session. Building her skills was part of preparing Milaan for the opportunity she's been desperately seeking. With all the impeding issues, Milaan remained steadfast in her objective to find a job. From job fairs, First Aid/CPR training and interviews, these steps were in place to help prepare her for the moment she so desperately was seeking.

After a few months, Milaan's son was finally responding to medication. Once she knew her son's condition improved, she hit the ground running in pursuit of employment. She had previously interviewed with the HR manager for Dearborn Schools at the job fair. She was granted an interview and hired that same week as a lunch aide in September 2017.

Milaan was so gracious for the opportunity to work in a school environment. The school is within proximity of her home and she's improving her English-speaking skills daily. Milaan was told that if she shows growth in her work, she will be considered for another position. Milaan's story started with hardship, and with hardship, she handled it with poise and incredible dedication. 'Creating a life from where you are,' is the profound testament to Milaan's journey.

Viviana's Success Story

In January of 2017, Community Mental Health for Central Michigan's, Mecosta County IPS Program began working with Viviana. Viviana had many barriers preventing her from obtaining and retaining employment at that time in her life. Compounding her lifelong struggles with mental illness, Viviana had recently been released from prison and was on parole, lacked long-term job history and references, possessed inadequate transportation to get to and from work, and had few natural supports within the community.

While completing the vocational profile with Viviana, she stated "it would be amazing if I went back to work". She also informed Amy Ecker, her Employment Specialist, that if she could obtain and retain employment, it would relieve her financial burdens, assist in developing relationships with others, and would also allow her to obtain her own housing and transportation. Viviana was dedicated to working with the IPS Program and set a goal of obtaining full-time competitive employment.

Over the course of the next year, Viviana had difficulty retaining employment due to incarcerations, lack of transportation, and issues with co-workers. In December of 2017, Viviana obtained employment with a local manufacturing company. Three months later, in March of 2018, Viviana obtained another part-time position as a cook with a local restaurant. She has been able to retain both of these positions and is considered a valued member of both teams. Viviana was recently offered a promotion to head cook with the restaurant she works for due to being a dedicated and reliable employee. Viviana has been with the manufacturing company for over eight months and with the restaurant for over five months. She is dedicated to her employers and enjoys going to work each day.

During this time Viviana has made many improvements within her life. She was able to pay off fines which allowed her to be released from parole in July, began visitation with her children she previously was unable to see, purchased a vehicle of her own, was able to obtain private insurance through her employer and end all state assistance, and is in the process of purchasing her first home! Viviana has

also been able to gain many supports within the community by creating healthy relationships within both of her current positions. She was recently nominated Consumer of the Month due to all the recent progress she has made and is successfully closing her services at Community Mental Health for Central Michigan.

While completing her exit summary for the IPS Program, Viviana stated "I look forward to going to work now. I feel like I found a job that I truly like, and I go the extra mile to make sure that I go to work." She also stated she has gained confidence in her employment seeking and employment maintenance skills through the IPS Program and feels "this is shown through the improvement I've made in my jobs."

Viviana did not allow any of the circumstances she was dealing with or barriers she encountered stop her from obtaining her dreams and goals. Watching Viviana grow throughout this process has been an amazing experience for Amy and one that shows the true value of the IPS Model.

Overview:

As previously noted, this is the third Evidence-Based Practice IPS report completed for the MDHHS/BHDDA representing the current 21 statewide IPS programs. To share program data and outcomes for statewide observation, the prior published report was published, printed and distributed to participating programs, stakeholders, and posted on the Michigan Department of Health and Human Service's website (https://www.michigan.gov/documents/mdhhs/Michigan_2017_Report_-Final_Revisions_2.22.18_620453_7.pdf). This report builds on previous reports, and continues the longitudinal observation of reported data from Michigan and identify organizational aspects about IPS programs, which vary across the state. The report describes the status of programmatic characteristics and conditions under which IPS programs serve Michigan residents through local CMHSPs or contracted providers. Information encompasses employment data, outcome measures, model adherence, business/consumer/employment staff interviews, and implications of the findings from this data.

Method:

Data collected for this report is from program supervisors, or from IPS staff for agencies that do not currently have an IPS supervisor. All of the programs that participated in this report identify themselves as providing IPS services and at minimum had an external baseline fidelity review during or before fiscal year 2017/2018. External fidelity reviews considered for this report were completed by the IPS Michigan Fidelity Assistance Support Team (MIFAST) external fidelity review team. Survey information was distributed and collected through Survey Monkey. This third report intends to continue observation of longitudinal data collection to be evaluated and developed accordingly with data collected and feedback from MDHHS/BHDDA, IPS service providers, and stakeholders.

Results/Aggregate Data Responses:

At the time of this report, there were 21 providers identifying as IPS programs. Of the 21 programs, five (5) achieved exemplary fidelity, eight (8) achieved good fidelity, and eight (8) achieved fair fidelity, (Figure 2). The reported number of individuals actively enrolled in IPS services during the reporting period was 1,465.

Of the 1,465 actively enrolled consumers, 492 were reported as having the Healthy Michigan Plan Medicaid as their primary form of insurance (Figure 1). This represents 33.58% of all actively enrolled consumers receiving this insurance during April, May, and June of 2018. This represents a decrease in individuals participating in IPS of 7.49% in relation to the 2017 report.

The IPS fidelity scale has three sections including staffing, organization, and services. Each section has various fidelity items evaluated on a five-point response format with a range of 1 = no implementation, 5 = full implementation, and intermittent numbers representing progressively greater degrees of implementation. The services identified in the fidelity manual as part of the IPS model include intake, engagement, assessment, job placement, job coaching, and follow-along supports before stepping down to less intensive employment support from another clinical or mental health practitioner.

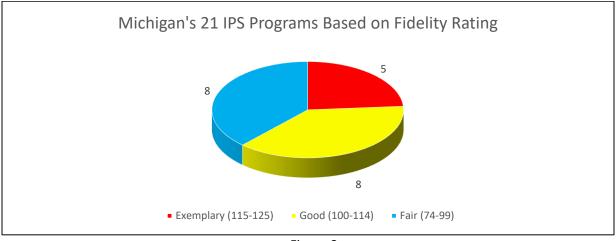

Figure 2

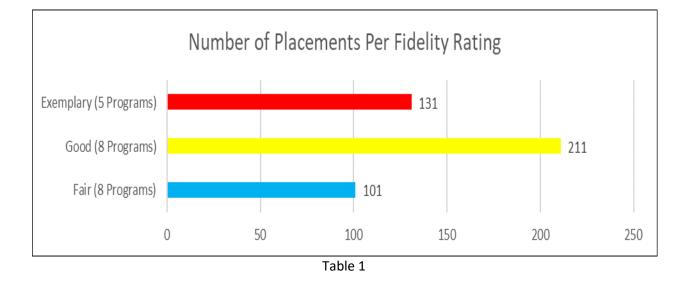

There are 83 counties in Michigan. Presently, 18 of the 83 counties in Michigan provide IPS services. Of the 21 providers of IPS services, five (5) are currently coordinated and staffed within CMHSPs and 16 are non-CMHSP contracted service providers. Of the 21 providers, some counties have more than one IPS service provider (Detroit – 10, Oakland – three (3)). In the reporting year ending September 30, 2018, one (1) agency in Detroit closed. Two additional programs from Bay Arenac which have fidelity reviews scheduled following this report are expected to be included in 2019 data report. For the intent of this report, the following color code is used to identify program(s) by level of reported adherence to the fidelity model (Figure 3):

| | - Goo - Fair - Awa | | | | |
|--------------|--------------------------|-----------|------|------------|--------------------------|
| | | _ | | _ . | |
| Color Coding | Кеу | Exemplary | Good | Fair | Awaiting Fidelity Review |

For counties with more than one IPS provider, the overall majority of fidelity model adherence is represented in Figure 3.

As will be noted in the following information, date ranges may vary given the type of information being gathered. The date range used for reporting the number of job placements for this report was April 1, 2018, through June 30, 2018 (FY 18 – 3^{rd} Quarter). The total reported number of job placements for IPS programs in the third quarter of 2018 was 443 new job starts. In the 2017 published report, the total new job starts reported was 389 which represents an increase of 54 job starts or, a 13.9% increase from 2017 to 2018. The 443 reported placements represent the total unduplicated count of new job starts. However, this number does not represent an unduplicated number of consumers as some individuals could have reported obtaining more than one job during the three-month timeframe. A breakdown of new job starts by corresponding fidelity score reflects the following: (Table 1, Figure 4.2)

- Five (5) Exemplary fidelity programs accounted for 131 placements out of 516 total active consumers in IPS programs which represent an average of 25% of caseload placed. Although the percentage of caseload placed during the time of the report decreased by 7%, an additional two programs received exemplary ratings and an additional 297 individuals are represented in 2018 fiscal year's report.
- Eight (8) Good fidelity programs accounted for 211 placements out of 645 total active consumers in IPS programs which represent an average of 33% of caseload placed. This represents an increase of 3% for 2018 fiscal year's report.
- Eight (8) Fair fidelity programs accounted for 101 placements out of 304 total active consumers in IPS programs which represent an average of 33% of caseload placed.

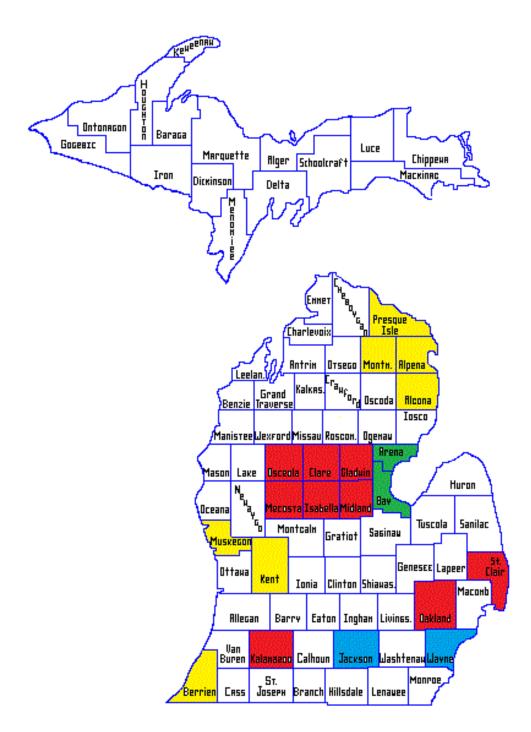

Figure 3 (IPS Sites at CMHSPs with at least a recognized external baseline review)

| (8 Programs) | | | |
| Totals | 443 | 1465 | 30% |

Figure 4.3 (2018 Report Data)

In 2018, despite one agency closing, the number of individuals reported as being served increased by 148 from 2017.

In the 2018 report, the addition of the number of consumers reaching employment milestones of 90, 180, and 365 days of employment is included (Figure 5). The 21 providers participating in the survey all submitted the unduplicated count of consumers reaching these milestones. The total number of individuals reaching 90 days of employment was 168 consumers, 180 days of employment was 69 consumers, and 365 days of employment was 66 consumers. Of the total reaching 90 days of employment, 51 were from exemplary fidelity programs, 80 from good fidelity programs, and 37 from fair fidelity programs. Of the total reaching 180 days of employment, 14 were from exemplary fidelity programs, and 27 from fair fidelity programs. Of the total reaching 365 days of employment, 14 were from exemplary fidelity programs, 21 from good fidelity programs, and 31 from fair fidelity programs (Figure 5).

The 21 providers participating in the survey all submitted their IPS program's average wage for employed consumers who were active on IPS staff caseloads from August 6th, 2018 through August 16th, 2018. The cumulative average wage per hour was \$10.40. This represents an increase of \$.30 per hour from the 2017 survey. The cumulative average hours worked per week was 26.89, compared 2017 data of 26.31 and 2016 data of 24.63 hours per week. This represents an increase of .58 hours per week in 2017 and 2.26 hours per week in 2016. The percent of caseload placed reported in 2017 was increased by .5% (Figure 4.1, 4.2, 4.3). The cumulative average wage of \$10.40 per hour is \$1.15 per hour above current minimum wage for Michigan (Table 2).

The reported average wage of \$10.40 represents \$1.15 per hour above the current Michigan's minimum wage through 2018 <u>http://www.michigan.gov/lara/0,4601,7-154-11407_32352-140972--,00.html</u> (Table 3) with the lowest reported average wage being \$9.25 per hour and the highest reported average wage at \$12.50 per hour.

| Michigan Minimum Wage Rates | | | | | | |
|-------------------------------------|-----------------|-------|--|--|--|--|
| | Basic Minimum | | Premium Pay After Designated Hours ² | | | |
| MICHIGAN | Rate (per hour) | Daily | Weekly | | | |
| (Applicable to employers of 2 or | | | | | | |
| more employees) | | | 40 | | | |

2 The overtime premium pay is one and one-half times the employee's regular rate, unless otherwise specified.

The State law excludes from coverage any employment that is subject to the federal Fair Labor Standards Act unless the State wage rate is higher than the federal rate. https://www.dol.gov/whd/minwage/america.htm#Michigan

Table 3

At the time of data collection, August 6th, 2018 through August 16th, 2018, twelve (12) IPS programs reported no waiting list for services while nine (9) programs reported having a waiting list. The total number of consumers reported as waiting for IPS services was 252 which is an increase of 26 individuals. Of those consumers reported as being on a waiting list for IPS services, 106 are waiting for services directly from a CMHSP site and 146 were waiting for services directly from a contracted provider agency (Figure 6). There were 57.5 total IPS staff throughout all 21 IPS programs (vacant positions were not included in total) that accounted for 54.5 full-time employment (FTE) positions. Reported data represents an average caseload size of 25.48 consumers per IPS employment specialist. In 2017, there was 63 reported IPS staff which is 5.5 more IPS staff than reported in 2018. In relation to the fidelity of caseload size, 25.47 consumers per employment specialist would represent a score of three (3) on the fidelity scale.

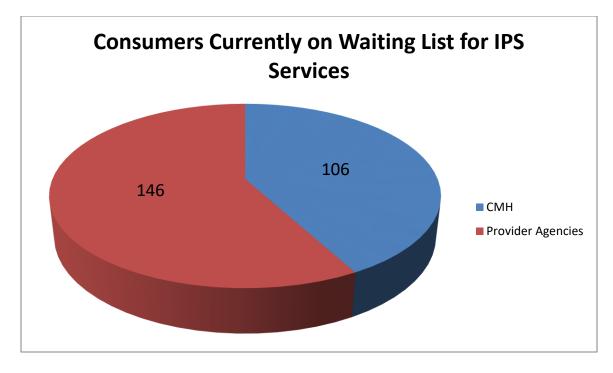

Figure 6

In an effort to continue cultivating staff and program relationships with community partners, IPS providers responded about their working relationship with Michigan Rehabilitation Services (MRS) and the Bureau of Services for Blind Persons (BSBP). Of the 21 IPS providers, 14 or 67%, report having a supportive relationship with MRS. This represents an increase of 8% identifying having a supportive relationship with MRS. Of the 21 IPS providers, 17 or 80.96%, report not having mutually served consumers with BSBP (Table 4, Table 5, Figure 7).

| Answer Options | Supportive | Neutral | Not Supportive | Currently No Shared Consumer Cases at This Time | Response Percent | Response Count |
|---|------------|---------|-------------------|---|---------------------|-------------------|
| Supportive | 14 | 0 | 0 | 0 | 66.67% | 14 |
| Neutral | 0 | 5 | 0 | 0 | 23.81% | 5 |
| Not Supportive | 0 | 0 | 1 | 0 | 4.76% | 1 |
| Currently No Shared Consumer Cases at This Time | 0 | 0 | 0 | 1 | 4.76% | 1 |

How would you describe your IPS programs working relationship with Michigan Rehabilitation Services (MRS)

Table 4

How would you describe your IPS programs working relationship with Bureau of Services for Blind Persons (BSBP)

| Answer Options | Response Percent | Response Count |
|---|---------------------|----------------|
| Supportive | 9.52% | 2 |
| Neutral | 9.52% | 2 |
| Not Supportive | 0.00% | 0 |
| Currently No Shared Consumer Cases at This Time | 80.96% | 17 |

Does your agency provide comprehensive benefits planning that works with consumers on state and federal benefits and/or work incentives? Please select all of the resources you use below: CWIC, AES employment staff have been trained by a WIPA from Disability Network in Kalamazoo. We were informed we have access to a CWIC, per email from Hank Bostic (Disability Network, Kalamazoo, MI) : "As of July 1, 2018 Disability Network Southwest MI will no longer be providing Social Security Disability benefits and work incentives counseling for the Work Incentives and Planning and Assistance (WIPA) project. As of July 1 you will need to make referrals for benefits counseling directly to the Ticket to Work Help Line at 866-968-7842 / 866-833-2967 (TTY) Monday through Friday from 8 a.m. - 8 p.m. ET. For general inquiries, you may e-mail <u>support@choosework.ssa.gov</u>. The Ticket Center will provide basic information and if a referral is needed they will send it on to the WIPA project coordinator for the state of Michigan, Cathy McRae at the Arc Michigan, Lansing. Cathy will then provide the contact information to the Community Work Incentive Coordinator (CWIC) covering the county in which the customer lives and they will make contact within 5 business days."

What was the score of your IPS program's most recent external fidelity review? Score 74

On average how many days does it take from initial vocational profile meeting to first documented community based job search? First face-to-face contact with an employer by the client or the employment specialist about a competitive job is on average within 30 days (one month) after program entry, Comments: Every effort is made for the job search to begin as rapidly as possible.

Does your IPS program place consumers in non-competitive employment settings? Yes, Comments: We do not "place" anyone in any setting. We work closely with each individual and their chosen circle on what they want their outcomes to be. STEP offers an array of services and we do not exclude any services if it is the choice of the individual and it is a logical step for them. For instance, someone with no work experience may choose to have trial work in one of our thrift stores or other community-based sites while also working with an Employment Specialist. If a person chooses something other than CIE, we would consider them to have opted out of EBP for the time being.

Does your IPS program provide follow along supports? Yes, Comments: As authorized and desired by the participant.

On average, how long are follow along supports provided? 9-12 months, Comments: Very individualized.

How would you describe your IPS program's working relationship with Michigan Rehabilitation Service (MRS)? Supportive
