[Serious Emotional Disturbance –  
Neuro Developmental Disabilities  
Initiative \(SED-NDD\) –  
\[events.mphi.org\]\(https://events.mphi.org\)](#)

This training takes a deeper look at the effects of FASD in children and youth. We'll explore how alcohol damages the developing brain and subsequent effects on day to day living. Stigma is explored as a barrier to services. A process for developing interventions to support those with FASD is described and key components in planning for transition age youth will be reviewed.

Presenter: Daniel Dubovsky, MSW, FASD Specialist, has worked for over 40 years in the field of behavioral health as a therapist in residential treatment, inpatient, outpatient, and community settings. He has been involved in the field of fetal alcohol spectrum disorders (FASD) for over 30 years. Dan has presented regionally, nationally, and internationally on FASD focusing on interventions and prevention for children, adolescents, and adults.

***Participants must attend both days to successfully complete this training and receive CEUs.***

***Location:***

*This will be a **virtual/online** training opportunity.*

**6 Social Work CEUs are available.**

Registration for this event will close  
**1 week before each learning event.**

This 2-part virtual training is provided by the **Serious Emotional Disturbance-Neuro Developmental Disorder Initiative** through the Division of Mental Health Services to Children and Families at MDHHS with **NO COST** to participate.
